From what I understand they were authorized to mine only the stockpiled material. They are now mining on the slope.

Wayne,

Thanks - We had a case file for that location, now closed - UTU-86615. The BLM file was closed on September 30, 2011. It's apparently a gypsum mine. I've never been there, since it was listed as Closed. If they are mining, they are in non-compliance. The operator is Cox Transportation.

That appears to be an area known as Little Salt Creek, about two miles east of State Highway 28. I'll let our management know.

Best wishes,

Duane Bays
